## SET UP NEW SCHOOLS

ESTABLISH NEW TRAINING SCHOOL -- Tehran, Rahnamai Mollat, 16 Jan 51

A school for training scientific cadres has been established in Poland under the supervision of the Central Committee of the Polish United Workers' Party. The basic aim of this school is to train scientific workers and teachers for higher educational institutions, party schools, and research institutions.

The training school consists of three departments -- philosophy, history, and political economics. It accepts graduates of the United Workers' Party who have been party members for 4 years, who have had university training, and who are connected with scientific work. The period of study at the school is 3 years, the final year being devoted to writing a scientific dissertation.

This course is similar to that pursued by graduates of the Soviet Communist Party, especially the one established by the Academy of Social Sciences under the supervision of the TsK VKP(b).

INSTITUTE TO TRAIN SCIENTISTS -- Munich, Slowo Katolickie, 29 Oct 50

In accordance with Moscow's recommendation, the Warsaw regime is now concentrating its efforts on training the largest possible number of party scientists. For this purpose, a special Institute for Training Scientific Cadres (IRRN), headed by Prof Adam Schaff, has been set up under the Politburo of the Communist Party.
